#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Remarks*

1. Claims 1-32 and 34-38 were canceled. Pending claim is claim 33 for reconsideration.

### *Claim Rejections - 35 USC 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

*A person shall be entitled to a patent unless --  
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.*

3. Claim 33 is rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka et al. (U.S. Patent No. 6,208, 376).

Regarding Claim 33, Tanaka shows a method for displaying live continuous video (col. 3 lines 25-60, video transmission, using a monitor for viewing displayed live video from video camera) comprising encoding video into a low resolution bit rate stream and a higher-resolution bit rate stream (Fig. 1, col. 3 lines 25-67, col. 8 lines 7-52, Fig. 14A and 14B, multiple resolutions streams with capability to switch between streams, transmission module uses MPEG compression, which inherently encodes the video, col. 3 lines 45-55) and displaying a single image of the video using the higher resolution bit rate stream (Fig. 12, 13, 16, 17, col. 8 lines 15-30, displaying image in watch mode with high resolution priority and regular mode with lower resolution and quality in the glance mode, refer to col. 8/lines 44-52). Tanaka also shows that the resolution changes when more than one video signals are displayed (col. 11/lines 10-25, when

Art Unit: 2611

single video display is selected, resolution is increased from pained display, and with a command for increasing a frame rate or raising a resolution).

***Response to Arguments***

4. Applicant's arguments filed on 12/5/05 have been fully considered but they are not persuasive because of the following reasons.

Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Please also note that the performing step calls for "at least one of the following actions", which means or equals to only one condition is needed to satisfy the performing step; therefore, Tanaka meets at least the first step and Tanaka does not have to further differentiate the steps of displaying a 2x2, a 3x3 or a 4x4 array of the video as argued by the applicant, if any.

Therefore, the examiner respectfully disagrees with the applicant and stands with the disclosure of Tanaka as previously disclosed and now discussed in this final office action.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. **Any response to this action should be mailed to:**
